

COMBINATION TOILET PLUNGER AND BRUSH

ABSTRACT OF THE DISCLOSURE

5 A tool for both plunging and cleaning plumbing fixtures and drains includes a handle and a plunger and a cleaning brush both coupled to the same end of the handle. The plunger is moveable between an extended position in which it covers a majority of the brush, and a retracted position in which it exposes a majority of the brush. The tool
10 may be used for cleaning with the plunger retracted and for plunging with the plunger extended. Exemplary embodiments are particularly useful for cleaning and plunging
15 toilets using a combination toilet plunger and toilet brush.
